https://github.com/Smile-517

Education

Yonsei University, Seoul *Mar 2022 – Present*
B.S. in Computer Science and Engineering

- GPA: 4.15/4.3 (major), 4.14/4.3 (cumulative)
- Coursework: Computer Systems, Logic Circuit Design, Programming Language Structures, Data Structures

Academic Honors

Honors [1] *Spring 2024*

Honors *Fall 2023*

High Honors [2] *Spring 2023*

[1] Students with a GPA of 3.75/4.3(3.5/4.0) or higher during the previous semester, and those within the **top 10%** of the students in their respective grade and field of study/college.
[2] Students with a GPA of 3.75/4.3(3.5/4.0) or higher during the previous semester, and those within the **top 3%** of the students in their respective grade and field of study/college.

Research Interests

I'm interested in the general area of computer science and artificial intelligence. I haven't decided yet what specific areas I would like to research, so I'm taking as many major courses as possible to find the ones that interest me the most.

Projects

Block Properties Editor *(personal project)* *Jan 2024 – Feb 2024*
code

- Developed a program that edits a configuration file for the Minecraft Complementary Shaders with patch files according to specified syntax.
- Tools Used: C++, Make (software)

Block Properties Extractor *(personal project)* *Jan 2024 – Feb 2024*
code

- Developed a program that searches and extracts entries within a configuration file and makes a new file according to specified syntax that can be used directly in the Block Properties Editor as a patch file.
- Tools Used: C++, Make (software)

RC Creative Platform *(contest)* *Mar 2023 – Nov 2023*
about contest / poster / video

- Designed a device that automatically detects a forest fire and throws extinguishing bombs in the direction of the fire.
- I contributed to the overall mechanism design and 3D modeling.
- I made a video about how the device works.

Skills

Programming Languages: C++, Python, Java

Tools: Google Cloud Platform (GCP), Oracle VM VirtualBox, PASCO Capstone, Adobe Premiere Pro

Operating Systems: Windows, Ubuntu

Languages

- Korean: Native
- English: 1st grade in 2023 College Scholastic Ability Test (within the top 7.83%)
